

scientaomicron

Start as soon as possible in Taunusstein in Germany as a:

1st Line Service Physicist (m/f/d)

Scienta Omicron provides Nobel Prize technologies for science and industry, through innovations in Electron Spectroscopy, Scanning Probe Microscopy and Thin Film Deposition in Ultra High Vacuum. Revenue 50 Million Euro and 175 employees in 2019.

Scienta Omicron's Materials Innovation Platform for Materials Physics and Surface Science supports researchers around the world with patented technology addressing the global race for smarter batteries, next-generation electronics, quantum technologies, solar energy, etc.

Scienta Omicron traces its origins back to the Nobel Prizes in 1981 for Electron Spectroscopy and 1986 for Scanning Probe Microscopy. Scienta Omicron is a fully owned subsidiary of Scienta Scientific AB, with main sites in Uppsala, Sweden and Taunusstein, Germany, and regional offices in USA, China and Japan.

Scienta Scientific AB develops long-term profitable technology-based niche businesses within the 20 Billion Euro Scientific Instruments for Physical Characterisation market.

WHAT IS IMPORTANT TO YOU IN YOUR JOB?

Of course, the earnings have to be right, as does the chemistry in the team. But there's more: for example, satisfaction or even pride in the results of your work.

YOUR TASK

This is an opportunity to join a team of specialists with focus on service/Support and installations in Europe and Asia Pacific.

- Providing application training to our customers
- Work close to the customer. Be perceptive to customers needs and ambitions
- Collaborate closely with sales for sales opportunities
- Be business-minded, while at the same time providing excellent support. This requires an understanding of the win-win proposition of profit and customer satisfaction.
