

# scientaomicron

Scienta Omicron provides Nobel Prize technologies for science and industry, through innovations in Electron Spectroscopy, Scanning Probe Microscopy and Thin Film Deposition in Ultra High Vacuum. Revenue 50 Million Euro and 175 employees in 2019.

Scienta Omicron's Materials Innovation Platform for Materials Physics and Surface Science supports researchers around the world with patented technology addressing the global race for smarter batteries, next-generation electronics, quantum technologies, solar energy, etc.

Scienta Omicron traces its origins back to the Nobel Prizes in 1981 for Electron Spectroscopy and 1986 for Scanning Probe Microscopy. Scienta Omicron is a fully owned subsidiary of Scienta Scientific AB, with main sites in Uppsala, Sweden and Taunusstein, Germany, and regional offices in USA, China and Japan.

Scienta Scientific AB develops long-term profitable technology-based niche businesses within the 20 Billion Euro Scientific Instruments for Physical Characterisation market.

Start as soon as possible in Taunusstein in Germany in this full time permanent position.

## FIELD SERVICE ENGINEER (M/F/D)

### WHAT IS IMPORTANT TO YOU IN YOUR JOB?

Expand your horizons and develop them further.

Make a real and lasting impact, drive improvements.

Gain ownership and success in your job.

Build your expertise to a new level.

You are looking to join a team of specialists focused on service/support and installations in Europe and Asia Pacific.

### YOUR TASK

In this hands-on, customer-facing role, you will perform a variety of tasks including installations, troubleshooting and repair, application support, user demonstrations and training.

Working closely with our customers, you will develop a sense of their needs and goals and work closely with our sales team to capitalize on sales opportunities.

Your work locations will be on-site at our customers, remotely or from the headquarters in Taunusstein / Germany.

### OUR BENEFITS

Start into a future with the best development opportunities and the security of a globally active group of companies.

Excellent compensation.

Comprehensive product training and expert support from our colleagues in Germany and Sweden

The opportunity to travel the world, see new places and meet international scientists up close.

Great colleagues in the European Sales.

### YOUR PROFILE

You have a bachelor's or master's degree in physics, electrical engineering or mechatronics or have completed a doctorate in a scientific subject.

You have already gained experience with working on surface science UHV systems.

You have experience or knowledge in one or more of the areas:

- **MBE** (Molecular beam epitaxy) and other thin film technologies
- **SPM** (Scanning probe microscopy)
- **ESCA** (Electron spectroscopy for chemical analysis)
- **ARPES** (Angle-resolved photoemission spectroscopy)
- **HAXPES** (Hard X-ray Photoelectron Spectroscopy)

Good command of English and preferably also German (not a must)

Be service minded and have a practical problem solving approach

Be business oriented while providing excellent support, you understand the connection between profit and customer satisfaction

You enjoy travelling and be available for installations and visits across Europe and Asia Pacific

### YOUR WAY INTO OUR COMPANY

The position will be located in Taunusstein / Germany and will be legally assigned to Scienta Omicron GmbH.

We are looking forward to your application.
